Merely no terms to spell out. We have read through and i also am confident that i will gonna read yet again again in the future. You will not sense monotony at anytime of your own time (that's what catalogs are for about should you question me).

Excerpt: . . . LECTURE XII. HEMATURIA AND RENAL CALCULUS. Gentlemen, --I propose to-day to complete the programme I originally designed for this course by considering a phenomenon of common occurrence known as Haematuria. Let us define the term. What is Haematuria The outflow of urine containing blood in admixture. Thus bleeding from the penis at other times than at that of micturition is, of course, not haematuria. Bleeding coincident with micturition from chordee, or operation, or from any known injury in the course of the urethra, is also not to be included. The blood then usually issues by the side of the stream of urine, and is only partially mixed at its line of contact, or it may follow rather than accompany the urine. Haematuria, then, is a symptom. Its presence is, in all cases of urinary disease, to be sought. Hence the inquiry forms one question--the third--of the necessary four which I instructed you always to ask in forming a diagnosis. Here is a glass of urine, evidently containing an admixture of blood. What is the source of it Now, it is often not an easy thing to state at once what point of that long and complicated organic apparatus, which commences in the Malpighian corpuscles and ends at the external meatus, is the source of the blood in question. Sometimes it is exceedingly difficult to define its source. Thus it is that in medicine you will often find some symptom, the pathological cause of which...
