Forgotten Books, United States, 2015. Paperback. Book Condition: New. 229 x 152 mm. Language: English . Brand New Book ***** Print on Demand *****.Excerpt from Report of the Results of Experiments Made by M. Le Docteur Boucherie on His Method of Preserving Timber: By a Commission, Composed of MM. Avril, Didion, Mary, 1850 The small expense of the apparatus will enable the process of preserving timber to be applied in cases where it has not hitherto been available. It will be economy for all proprietors of land of any extent, to preserve the timber used on their estates for fencing, farm-buildings, gate-posts, c.; an advantage that has hitherto been denied them, as the impregnation of the timber (however effective the material may be) is entirely useless applied under great pressure, which requires expensive cylinders and steam-apparatus, involving an expenditure of from 500 to 1,000. As stated before, the tubular structure of trees has of course long been known, and the idea of impregnating the tree by means of the sap-tubes has long engaged the attention of scientific men; but it has fallen to the lot of Dr. Boucherie, with a perseverance rarely excelled, to bring about its practical application, and with a degree of entire success, as will be seen by the annexed printed French official Reports, the first of which was made by order of the French Government in the year 1850, by a commission composed of the following distinguished engineers of the Ponts-et-Chaussees: - M. Avril, M. Didion, M. Mary. The second in the year 1852, addressed to the French Minister of Marine, by a naval commission composed of the principal officers of the Genie, as follows: - M. Leroux, Inspecteur-general du Genie maritime, M. Sochet, Ingénieur de la Marine, M. Uupony, Capitaine de Fregate. About the Publisher...
